

# Tirth Chheta – Data Scientist

Jersey City, NJ | [tirthchheta511@gmail.com](mailto:tirthchheta511@gmail.com) | +1(203) 627-3270 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | [Medium](#)

## SUMMARY

MS Data Science graduate with **2+ years of industry experience**, skilled in **Python, SQL, machine learning, predictive modeling, and dashboarding**. Experienced in **forecasting, feature engineering, and deploying scalable ML solutions** using **FastAPI** and **Docker** to drive **business insights** and **decision-making**. Seeking **Data Scientist / Data Analyst** opportunities.

## EXPERIENCE

### Evaanish Technologies Corp

Data Analyst (Full-time, Remote)

Anaheim, CA

[January 2026 - Present]

- Cleaned and validated business data using **Excel, SQL, and Power BI**, improving reporting **accuracy by 25%**.
- Built **Power BI dashboards** and **KPI reports**, reducing manual reporting time by **30%**.
- Performed **data validation** and trend **analysis** to improve data reliability by **20%** and support team **decision-making**.

### Tecrave.org

Data Scientist (Full-time, Remote)

Ahmedabad, India

[July 2023 - August 2024]

- Built and deployed classification, regression, and forecasting models using Python, scikit-learn, **XGBoost**, and **PyTorch**, achieving up to **87%** predictive accuracy.
- Developed **LSTM** and **Prophet models** for time-series **forecasting**, reducing prediction error by **24%**.
- Performed **feature engineering, data cleaning, and EDA** using Pandas and NumPy, improving **model** performance by **18%**.

### Laxmi Software Technologies

Python Developer (Part-time, Onsite)

Surat, India

[June 2021 – April 2023]

- Developed Python scripts for **backend automation** and **API integration**, reducing manual processing time by **40%**.
- Developed **Power BI** and **Tableau** dashboards for inventory and pricing **reporting**, improving efficiency by **35%**.
- Conducted **anomaly detection** and **data cleaning**, ensuring **95% data** quality across workflows.

## PROJECTS

### Hospital Readmission Prediction Using Machine Learning

- Developed a patient readmission **prediction model** (Random Forest, XGBoost) on **UCI Diabetes dataset**, achieving **88% accuracy** by applying feature engineering, **SHAP analysis**, and missing value imputation to identify top **risk factors**.
- Built an interactive **Power BI dashboard** visualizing patient risk scores and readmission trends for hospital resource planning.

### Air Quality & Environmental Pollution Forecasting System

- Built **LSTM** and **Prophet models** to forecast **PM2.5** and **CO2** pollution levels across **50+ U.S. cities**, achieving **85%** accuracy.
- Deployed the **forecasting** model via **FastAPI** and built a **Power BI** dashboard to visualize real-time **AQI trends**.

### E-Commerce Product Recommendation Engine

- Built a hybrid recommendation system using collaborative filtering and **matrix factorization**, achieving 91% precision.
- Deployed recommendation API using FastAPI and Docker, tracking engagement KPIs through a real-time Tableau dashboard.

## SKILLS

**Programming Languages:** Python, SQL, R

**Machine Learning & AI:** scikit-learn, XGBoost, PyTorch, LSTM, ARIMA, Prophet, Random Forest, SHAP, Hyperparameter Tuning

**Data Analysis:** Pandas, NumPy, PySpark, Feature Engineering, ETL Pipelines, Exploratory Data Analysis (EDA)

**Visualization & BI:** Power BI, Tableau, Matplotlib, Seaborn, Plotly, Plotly Dash

**Database & Cloud:** MySQL, PostgreSQL, SQL Server, AWS S3, AWS Glue, AWS Lambda

**Deployment & Tools:** FastAPI, Docker, MLflow, GitHub Actions, Apache Airflow

## EDUCATION

### University of New Haven

MS in Data Science (**Relevant Coursework:** Machine Learning, Deep Learning, NLP, Computer Vision)

West Haven, CT

[August 2024 - May 2026]

### Veer Narmad South Gujarat University

Bachelor of Computer Applications (BCA)

Surat, India

[August 2021 – April 2024]

## PUBLICATION

Published NLP research paper at **ACINT 2025 (Dubai, UAE): “Text Summarization using NLP: An Extractive Framework with Web-Based Interaction”** using Python, spaCy, Streamlit, and ROUGE metrics for scalable real-time document summarization.
